

MARCO ANTONIO CANUX RAQUEC

SOFTWARE DEVELOPMENT TECHNICIAN

ABOUT ME

I am a proactive, responsible person committed to continuous learning, with the initiative to solve problems, adaptability to new challenges and an ease for teamwork. I stand out for my creative thinking, my ability to analyze alternatives and my focus on results. I enjoy exploring new ideas, taking on responsibilities and contributing practical solutions, while staying open to dialogue and to developing my personal and professional skills. On a personal level, I am curious and I like to learn from the people I work with and grow alongside them. I am passionate about reading, music and art in general, and I enjoy nature and outdoor activities, especially when they involve meeting new people.

WORK EXPERIENCE

Campuslands GT
2026 – Present

Software Developer Technician – Frontend

Developed a children's exercise and hydration mobile app with 15 interactive levels in React Native, featuring real-time motion capture (Edge AI) with MediaPipe Pose running 100% on-device. Offline-first strategy with AsyncStorage and Firebase, delivered in 7 weeks using Scrum and Git. Cross code reviews, optimization to 30+ FPS and testing on Android and iOS.

Villa de los Niños
November 2024 – December 2025

Automotive Mechanics Instructor

Delivered theoretical and hands-on training in Automotive Mechanics, supervised technical work and planned content, activities and assessments according to the learning objectives. Strengthened communication, leadership and teamwork by coordinating educational activities.

EDUCATION

Campuslands GT
January 2026 – Present

Software Development Technician

Management system for gyms and personal trainers, built in Node.js (command line) with MySQL 8. It manages clients, training plans, contracts, physical progress tracking, nutrition and finances. Designed with OOP, SOLID principles and the Repository and Factory patterns, using transactions for critical operations.
